Fairfax County: Test Track for the Future of Autonomous Vehicles
Wednesday, May 3, 2017
12:00 PM - 5:00 PM
Fairfax County Govt. Center

Fairfax County is the test ground for self-driving cars and connec .ed infrastructure in Virginia. The state's intelligent roads are all located in Fairfax, and top autonomous vehicle researchers come here to road test their technology.

We're bringing together AV experts, policy makers, manufacturers, and entrepreneurs to present ongoing research, showcase technology—**including offering demonstration rides**—and discuss the future impacts.

We're looking to the future—so join us for this free event, the first in a series on this topic, if you want to be part of what's to come in Fairfax.

Due to limited space, **registration is required.**
